

# Dixie State University Policy

---

## 402 Blood Borne Pathogens

### I. Purpose

- 1.1 To provide policy regarding blood borne pathogen exposure as an action plan to guide the Administration and/or assigned personnel in pathogen exposure education, control and procedure regarding exposure incidents occurring in Dixie State University facilities or the Campus property.

### II. Blood Borne Pathogens are:

- 2.1 Human blood, components and products made from human blood;
- 2.2 Microorganisms that are present in human blood that can cause disease.

### III. Procedures

- 3.1 It is the policy of Dixie State University to:
  - 3.1.1 Provide a written exposure control Plan which will comply with 29 Code of Federal Regulation (CFR) 1910.1030 Blood Borne Pathogens Standard, 6 March 1992, for review by employees and Occupational Safety and Health Administration (OSHA) compliance officers.
  - 3.1.2 Make the written plan available at the Physical Plant Office and at each University building as an attachment to the existing Material Safety Data Sheet plan and document books.
